Serion-Heavy-Italic.ttf

Serion-Heavy.ttf

Serion-Light-Italic.ttf

Serion-Light.ttf

Serion-Medium-Italic.ttf

Serion-Medium.ttf

Serion-Regular-Italic.ttf

Serion-Regular.ttf

Glyphs are either accessible directly through Unicode codepoints or through substitution rules.

In Color Fonts, glyphs are also referenced by the COLR table. And

mathematical fonts also reference glyphs via the MATH table.

Any glyphs not accessible by these means are redundant and serve only to increase the font's file size.

WARNunreachable-glyphs

The following glyphs could not be reached by codepoint or substitution rules:

_corner.SerifC

bshape

drightcorner

INFOFont contains all required tables? (Affects 12 files)
